REPORT.

To the Honorable the Senate

and House of Representatives of the State of Louisiana :

In compliance with law the following Report of the Board of Administrators of the Charity Hospital is respectfully submitted to your Honorable bodies.

The Clerk's Report exhibits that the number of patients admitted into the Hospital during the year 1858, was 11,337; discharged 8,923; died, 2,290; being an increase of 2,440 patients on the number treated the previous year. This increase is of course attributable to the epidemic which prevailed during the Summer months, and until late in the fall.

From the statement of the Treasurer it will be perceived that the balance in his hands at the commencement of the year 1858 was.....\$8,955 72

Received since.....64,803 75

Total.....\$73,039 47

The disbursements during the year 1858 were..... 70,846 67

Balance on hand 1st January, 1859..... 2,192 80

Total.....\$73,039 47

The amount expended in the year 1857 was.....75,847 39

Although the actual disbursements, in cash, during the year 1858 only amounted to \$70,846 67, yet the Hospital, on the first of February next, will be in debt \$21,000, of which \$5,000 is a note given for borrowed money, and the balance for supplies already furnished and to be furnished during the month of January, 1859.

In order to ascertain the actual current expenses of the Institution

during 1858, the following sums must be deducted from its payments and liabilities :

1st. About \$9,000 paid out in 1858 for debts contracted for the year 1857, as appears by the report of last year.

2d. About \$4,000 for the supplies of the month of January, 1859, which are included in the above indebtedness of \$21,000.

3d. \$1,000 paid the New Orleans Draining Company on a judgment recovered for draining the land used as Hospital Cemetery.

4th. \$1,250 paid for new boiler to supply the house with water.

5th. \$1,000 for new, indispensable additions and improvements, including a new brick shed for boiler and cemetery fence.

6th. Cash on hand \$2,192 80, part of the borrowed money—making a total of deductions of \$18,442 80, and leaving as the actual current expenses of the Institution for the year 1858, \$73,403 87.

This exhibits a diminution of the current expenses as compared with last year of at least \$2,400, while the number of patients received into the Hospital in 1858, exceeded that of 1857 by 2,440.

The appropriation made last year was only \$22,000.

That appropriation was based on estimated receipts from other sources of \$45,000.

So far from those estimates being realized, the tax on passengers, estimated at \$30,000, only produced \$19,640 25; and the tax on balls and concerts, instead of \$5,000, brought into the Treasury only \$3,525. It is too true that the year 1858 in New Orleans has been one of sorrow and affliction—not of balls and concerts.

The income from theatres amounted to about nothing, they having paid only the specific tax of \$100 each; the benefits provided for in the Act of 1857, in lieu of the specific tax of \$500, have not yielded one cent to the Hospital.

These facts account for the necessity of borrowing money to carry on the affairs of the Institution: the actual revenues of the Hospital excluding the loan of \$5,000, and including the State appropriation, having amounted to only \$59,083 75.

It is therefore evident, that an appropriation of at least \$40,000 will be required for the maintenance of the Institution for the year 1859.

The annual diminution of its revenues, derivable from the sources provided by law, renders the conclusion inevitable that the Charity

Hospital will become a constant and heavy burden on the State Treasury, unless speedy and effectual measures be taken to create for it a permanent and reliable income by taxation.

It is suggested that the tax on theatres, of \$500, be reinstated, and the benefits provided for by the act of 1857 be dispensed with.

It is also suggested, that the fines imposed by the First District Court of New Orleans and the Recorders of the city, be paid into the treasury of the Hospital, especially since the State has assumed the payment of the expenses of the prosecution of criminals in the respective parishes.

We cannot commend too highly the conduct of the respective officers of the Institution, and take pleasure in bearing testimony to the effective and regular performance of their duties.

The internal economy of the Institution is entrusted to the Sisters of Charity; their untiring devotion to suffering humanity is too well known to require commendation. We cannot, however, refrain from saying, that it is greatly to the management of the domestic affairs of the Institution by these ladies, that the Charity Hospital has become the pride and boast of the State.

J. N. LEA, *Vice-President.*

STATEMENT "G" OF EXPENDITURES
Of the Charity Hospital for 1858.

January	5.	Paid J. D. Brownlee, sundries for Apothecary shop.....	\$ 6 50

REMARKS.—In some instances the number of discharges and deaths, will exceed the number of admissions, and vice versa. This proceeds from the patients having several diseases at the time of their entrance, and, therefore, of their being discharged cured, or dying, of a different disease from that which they had on being admitted. Also, they frequently contract new diseases in the house, for which they are subsequently treated, and finally discharged.

I may also mention when the discharges or deaths exceed the number of admissions, it may be owing to the number of patients who are remaining in the hospital at the end of the last year, who have since mostly all died, or been discharged, and vice versa. When the admission exceeds the number of discharges and deaths, it is owing to the number of patients still in the hospital, who have neither died, nor been discharged.

Many patients are admitted "among whom rank children either at the breast, or too young to be separated from their mothers," who when examined by the Physicians and declared not sick, appear in my report under the denomination of *Nothing*. Others leave the hospital, or die previous to the visit of the Physicians; many also have gone out carrying their tickets with them; it is therefore out of the power of the Clerk to ascertain the diseases they were afflicted with. They figure under the denomination of *Uncertain*.

HENRY VANDERLINDEN,

Clerk, Charity Hospital.
